Olympic Energy Systems, Inc.

an energy consulting and system development firm based on the North Olympic Peninsula in Washington State USA. The company provides expertise and support to clients considering renewable energy systems – solar electric, wind power, hydro power, and other systems. Our independence assures the best price!

The company serves as **System Architect** on projects...

and **advocates** for the client, assuring cost effectiveness and optimal system performance. Let us define your **System Spec**.

Through the use of its RCM Cost Model

the **System Architect** can provide cost estimates, economic analysis, and cost sensitivity analysis to assist in the decision to procure or develop systems, allowing the client to identify the system type, size, economic conditions, and financing approach best suited for them.

Other services are provided, including:

System Checkout, System Inspections, and Troubleshooting.

Olympic Energy Systems, Inc. is interested in **three basic goals**:

- Incorporating systems effectively for **optimum performance**,
- Providing for the **best economic return** to the client, and
- Improving the overall energy problems toward true **sustainability**.

Incentives are available to grid-tied solar PV owners...

- 1) Net Metering (allowing retail electricity cost avoidance)
- 2) **Federal Tax Credit of 30%** (uncapped after 12/21/08; through 2016)
- 3) Utility Rebates (usually about \$0.50 per watt)
- 4) Production Incentives in Washington State (\$0.15 to \$0.54 per kWh)
- 5) Green Tags (of \$0.05 per kWh paid for the green attributes of PV)

The **Olympic Energy Network**, managed by **Olympic Energy Systems, Inc.**, develops systems and organizes the variety of components, concepts, and contractors into cost-effective solutions. **CALL 360 301-5133**
