

ANNOUNCEMENT – March 2011 [This is the first of recurring monthly announcements about our developments in solar]

Olympic Energy Systems of Port Townsend is formally announcing its new system for mounting solar panels that promises low cost and high value with major progress towards true sustainability. The innovative system departs from the conventional to allow more local input into our energy future.

Roof Mount

Ground Mount

Tensioned Cable System for mounting solar panels [patent pending]

Roof Mount with no roof penetrations and **Ground Mount with no foundations**

A CALL FOR PIONEERS

We are looking for those who would be interested in going solar with home grown innovated technology, pioneers to spur us on to real sustainability and local job growth.

Those who implement our pre-production solar panel mounting systems will have a Special Discount installed system price, with the assurance that any improvements made by the time of full production (and a result of production processes still in work) will be retrofit Free Of Charge. Benefits accrue immediately, as hardware and installation costs are lower than any other approach available today. We develop systems with small arrays to multiple-string arrays from less than 1 KW to over 100KW grid-tied.

Review our mounting kits summarized in our [TCS Brochure](#)
